At a Glance

Audaxia Global was founded as an independent group, from a team of senior professionals accumulating several decades of experience in some of the largest projects and organizations :

- Comprehensive approach to Technical Assistance Services and Project Solutions
- In the field of Energy and Infrastructure sectors
- Covering all dimensions of the project life cycle, supporting technical processes as well as "people management"

Our Mission :

- Ensure our clients vision become a reality
- Achieve optimal business performance and surpass expectations
- Provide tailor-made solutions to cope with diverse project and business ecosystems

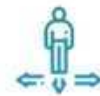

We value:

Audacity

Integrity

Independence

Flexibility

1. WHO WE ARE

2. OUR EXPERTISE

3. REFERENCES & CASE STUDIES IN MYANMAR

Why Audaxia ?

• Project needs

- Fill the gap between the project technical requirements and client's in-house expertise

• Our Response

Practical hands-on understanding of projects

• Our Offering

- Mobilize the best skills to match the technical needs
- Decades of experience in some of the largest projects and organizations
- Supporting technical processes as well as "people management"

- Multi skilled and adaptive solutions throughout the project life cycle

Tailored and Scalable Approach

- From individual consultants to multi-functional integrated team
- From blue to white collars, local and foreigners
- Practical and responsive support

- Competitive project support services

Lean Organization

- Flexible and efficient business structure
- Optimized overhead costs
- Strong local content strategy

Our Solutions

Audaxia Global interacts with our client's organization to deliver tailored solutions throughout the project life cycle and can provide an entire multi-functional integrated team or individual consultants embedded within the client's project team or organization.

What we do :

- Technical Assistance and Project Support
- Manpower Contracting (wide scope of skills, expertise and positions / Locals & Expatriates)
- Project Management Training and Coaching (PMP® standards)

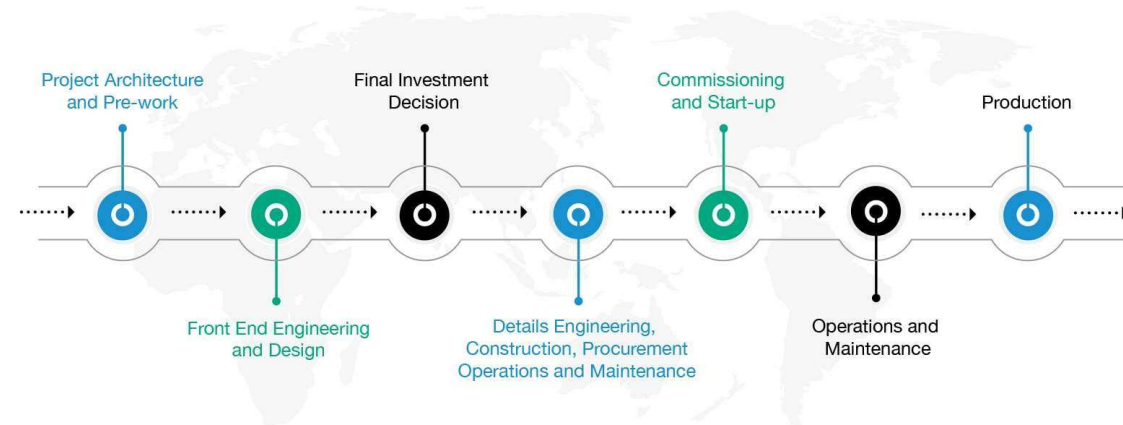

Our Disciplines

Audaxia's expertise is underpinned by a practical hands-on understanding of projects full life cycle and the need to enroll the best skills to achieve the expected project goals

Our solutions are provided within the following project phases and disciplines:

- Engineering, Construction & Commissioning
- Drilling & Completion
- Operations & Maintenance
- QHSE Management
- Contract Management, Procurement and Project Controls
- General & Administrative

Our Added Value

Our team, formed by technical experts in the field of Energy and Infrastructure sectors, mobilizes the best skills matching our client expectations.

Our Operations division manages Global Mobility in remote and complex project environment, efficient integration in the project or organization structure and takes into account relevant local content compliance requirements:

Skills Sourcing & Acquisition

- Talent Sourcing
- Skills Screening & Evaluation
- Certification Control
- Recruitment & Enrolment

QHSE Management

- Medical Fit to Work Check-Up
- Safety and Competency Trainings
- Personal Protective Equipment's
- HSE Performance Monitoring
- 24/7 Emergency Support
- Health Insurance

Contract, HR & Administrative Support

- Payroll and HR Processes Management
- Taxation and Legal Compliance
- Contract Administration
- Local Content Management

Global Mobility

- Immigration, Visas and Works Permits
- International and Local Personnel Logistics
- Meet & Greet, Accommodation and Security
- International Medevac Insurance
- Crew Change Management

Operations & Maintenance

TOTAL

Project : Operations & Maintenance / Onshore & Offshore

Operator: Total Exploration & Production Myanmar

TEPM has been involved in exploration and production in Myanmar since 1992, when they began developing the Yadana field to supply gas to the local and Thai markets.

Location: Myanmar

The Yadana gas field is an offshore gas field in the Andaman Sea. It is located about 60 km offshore to the nearest landfall in Myanmar.

The Yadana offshore complex consists of 1 Living quarter + 3 Process platforms + 1 Flare + 1 Well-Head platform + 3 remote WH platforms

Competence required:

- Field Manager
- Electrical Technicians
- Instrument Technicians
- HSE Technician

Period: Q2 2019 to Present (Ongoing)

Audaxia project participation:

The provision of supervisors and engineers dedicated to the following activities:

- Directs, supervises and coordinates all field production operations
- Instrumentation and Electrical Engineering
- Assists for all HSE activities on the onshore facilities
