## Introduction

Myanmar has been developing fast since its opening in 2011. The country offers a great potential of growth, in part thanks to its demography:

- Around 51 million inhabitants, which makes it one of the largest population in ASEAN;
- A young and active population (25\% between 0 and 14 years old, $67.5 \%$ under 64 years old);
- $2.5 \%$ of annual urban population growth rate and $2 \%$ of annual population growth rate;
- An unemployment rate under $2 \%$.

Yet, despite these strengths, Myanmar is also facing tremendous challenges, partly due to its long isolation, which need to be tackled in order to allow the country to achieve its potential and to realize its objectives, as well as a sustainable development.

One of the main challenges is the human resources and the issues which are related to them: low average level of education, lack of professional skills and of experience, difficulties in implementing international standards and processes, challenging legal \& labour framework, misunderstandings in crosscultural work environments, important staff turnover, and so on.
In this context, CCI France Myanmar has decided to launch this survey for the following reasons:

- Myanmar doesn't have an accurate salary survey available for free, so companies have no way to see if they are under or overpaying their staff.
- All businesses benefit from data on salary ranges in their industry as well as other industries.
- All developed markets have an accurate salary survey, but the salary surveys in Myanmar are only getting information from a small number of companies and are not an accurate representation of the market.

This 2020 edition is the third edition of our annual Myanmar Salary Survey
This Myanmar Salary Survey should only be viewed as a guide. Our survey group was spread across a variety of industries and we received 510 responses, mostly from companies from the Yangon region.

The small number of answers received for some positions in some sectors may affect the reliability of some data in this guide, but still manage to provide information on the rough level of salaries in main sectors in Myanmar.

This survey was done before the beginning of the covid-19 pandemic and therefore doesn't account for the impact of this crisis on the Myanmar economy in 2020. The latter will certainly show in the next edition of the survey in 2021. We thank you in advance for participating in it, to make sure that the results are as accurate as possible.

## PROCEDURE

This salary survey 2020 I the third edition of our annual Myanmar Salary Survey. Invitations to complete the survey were sent in February 2020. Respondents were invited to submit their responses online, anonymously, in MMK (Myanmar Kyat).

The average exchange rate used for this survey was the following: 1 USD $=1,500 \mathrm{MMK}$.

A user guide was provided to explain to participants how to take the survey.
Participants were asked to provide information about the industry to which they belong, the size of the organization in which they work, the minimum and maximum amount of salaries, the annual bonus, the commission for sales persons, the allowances and salary increase percentage for previous year, according to their respective departments and industries

## EXECUTIVE OVERVIEW

Myanmar is one of Asia's last frontier market, promising to become the next South-East Asian rising star. After years of isolation, the country opened up in 2011 and implemented substantial reforms that established the fundamental basis for the real development of the country

The average annual growth Myanmar's GDP is now between 6 and $7 \%$, making it one of the highest in Asia and in the World. While the covid-19 will impact its growth in 2020, the forecast is that the country will continue to develop at a similar pace in the future, thanks to its many resources, thus offering a great potential for companies investing and operating in the country.

It also faces challenges that all are potential opportunities for foreign investors. Its population is the second poorest in Asia but the demographic profile of the country is also a strong catalyst for economic expansion, with more than half of the 51 million people in Myanmar aged 27 or less. Even though Myanmar was previously known as the "missing link" between China and India, it has benefited across the last five years from massive public and private investments in infrastructure, which have turned the country into a new trade outpost for investors in the region.

Participants were not asked any other personal/company details or company's confidential information, so that employees feel comfortable giving the accurate information. Therefore, this survey is $100 \%$ anonymous and free.
In the present document, results are set out by industry in alphabetical order. Each job category and level is listed but, in some cases, positions or levels were removed or changed, if didn't exist in the category or industry, to improve the presentation of the survey.

This survey only concerns gross salaries (allowances and benefits excluded) for employees working in Myanmar under local contracts, both Myanmar Nationals and Foreigners.

In some cases, we noticed that salaries were extremely low or high and we therefore realized that some members in the survey group may not have understood the goal and rules of the survey. Therefore, we decided to removed these corrupted data to ensure the integrity of the results.

This survey was launched before the beginning of the covid-19 pandemic. Therefore, it doesn't show its impact on employment and on salaries in Myanmar.

If you have any questions about this survey and the results, please contact Mrs. Pascaline Griffon at business.manager@ccifrance-myanmar.org
